

Tomorrow's Tailoring

Polychromelab's textile manufacture is located in Serfaus-Fiss-Ladis. Here we produce hand-made and custom-build outdoor apparel. In the mountains nearby we run a lab for textile research to improve product development.

We're looking for a new member to reinforce our team. Are you already experienced in **textile processing, editing technique and tailoring**? Do you want to engineer tomorrow's outdoor apparel? We hire you as a tailor on a full-time basis for at least two years.

You will be working alongside our designer and tailor. Your duties would include: product development / prototypes, custom-builds and repairs / clothing workshops and customer consulting / logistics and inventory. We use modern editing techniques like ultrasonic welding.

What you offer:

- vocational school or university degree
- experience in textile processing and editing
- enthusiasm for sports and design

What we offer:

- full-time employment for two years / salary: € 1,500 gross (overpayment possible)
- an opportunity to bring in your own ideas
- unique workplace in Serfaus-Fiss-Ladis

Send your application to Elisabeth Frey (info@polychromelab.com).

We're looking forward hearing from you!
Elisabeth Frey & Michele Stinco
